

SLOAC Review Comments

Following a discussion by the SLOAC, the following items were communicated to the department in a face-to-face meeting.

EECE Plan:

- Missing measurement instruments (rubrics).
- Missing Department Chair's and Dean's signature.
- Missing record of program consultation and support.
- Sometimes the mission goals boxes checked on planning forms are not appropriate

EECE Report:

- Missing record of program consultation and support.
- Suggest that full titles be used instead of acronyms.
- Missing Department Chair's and Dean's signature.
- Suggest organizing the comparison rates into a table for each Student Learning Outcomes and that they are statistically analyzed using t-tests. This would make it easier for readers to see at a glance where the averages are different.
- Suggest dating both the report and plan.
- In some cases there was confusion on whether the report was dealing with an old Student Learning Outcome (SLO) or a new SLO.
- If data is collected yearly, why is only 1999 and 2005 compared?
