

Construction Management

The Construction Management program will be requiring junior-level students to integrate laptop computers into the curriculum starting fall semester 2009. **All CM majors who enroll in CM 330, Construction Estimating I, will be required to purchase and utilize laptop computers in their CM coursework.** CM 330 is the beginning of a 4-semester sequence of courses where laptops will be required for their junior and senior years. **Freshman and sophomore level CM courses are exempt from this requirement.**
