

## Dreamweaver

1. Open **Adobe Dreamweaver CS3**
2. Select **Site** and choose “**Manage Sites**”
3. Select “**Edit**” on the website you would like to modify the settings for.
4. Enter your new password
5. Click on the box in front of “**Use passive FTP**”.

6. Click **OK** and then **Done** on the “**Manage Sites**” window
7. You should now be connected to your website and should be able to edit your websites.
8. Your **web pages** and **folders** should be listed to the right. Also in the bottom left corner is the **Results** window that has the **FTP Log** tab which could be useful if your over quota or password expired.
