

Dreamweaver

1. Open **Adobe Dreamweaver CS3**
2. Select **Site** and choose “**Manage Sites**”
3. Select “New...” and choose “FTP & RDS Server”
4. In the Name: box enter your website name (i.e. beckercr)
5. Leave the Access type as FTP
6. For the FTP host enter www.mnstate.edu
7. For the Host Directory enter the website name (i.e. beckercr)
8. Enter your login and password information in their respective boxes
9. Click on the box in front of “Use passive FTP”.

10. Click **OK** and then **Done** on the “Manage Sites” window
11. You should now be connected to your website and should be able to edit your websites.
12. Your **web pages** and **folders** should be listed to the right. Also in the bottom left corner is the **Results** window that has the **FTP Log** tab which could be useful if your over quota or password expired.
