

Required Text and Materials For Chem 341/342 in Summer 2009 or Summer 2010:

- 1) Text: "Organic Chemistry", 7th edition, J. McMurry
- 2) Solutions Manual: "Study Guide and Solutions Manual for McMurry's Organic Chemistry", 7<sup>th</sup> Edition, S. McMurry. (The text and solutions manual may be available as a bundle at Varsity Mart.)

Optional: Darling Molecular Models, available in the Varsity Mart.

Note: I appreciate how expensive the textbook and solutions manual are. If you have a copy of McMurry 6<sup>th</sup> edition, you can use that rather than buying a new 7<sup>th</sup> edition. Also, if you have a version of Wade's Organic Chemistry, as used at MSUM, that too could be used in place of the McMurry textbook.
