Students should work with their advisor to design the best progression for them.

Part Time progression plan – Spring Start: Approximately 7 semesters to complete (about 2.5 calendar years). ****This is the most common progression plan selected by students!**

*Indicates foundational MHA courses that need to be taken in the student's first year. **Represents Capstone courses that need to be taken in the student's final semesters (majority of course work needs to be completed before enrolling). Students can fill courses into their schedules based on seats/enrollment; students work with their advisor to ensure appropriate academic progression.

Pre-Requisite: Graduation from an accredited undergraduate program/GPA requirements (see application), undergraduate statistics for MHA 615, at least one year of healthcare experience and/or healthcare specific coursework.	
Possible/Typical Progression Plan: Students can progress at their own pace (for example take one course per semester). Students must complete their graduate degree within 7 years of taking their first course. It is recommended that students do not take more than 3 courses per semester to be successful in obtaining their degrees.
