Action research is the second and final research course in the C & I program. The primary focus of the course is to provide students the skills to use action research methods to improve education through data driven decision making. In this course, students carry out action research (which has been designed in ED 603) by collecting and analyzing data, and developing a plan of action and a plan for sharing results. The major requirement for this course is the submission of a paper in a manuscript format that integrates the research questions, methodologies and literature review developed in ED 603 with the findings and action plan developed in ED 696.
