## **Minnesota State University Moorhead**

# AT 625: Athletic Training Clinical Experience I

## A. COURSE DESCRIPTION

Credits: 2

Lecture Hours/Week: 2

Lab Hours/Week: 0

OJT Hours/Week: \*.\*

Prerequisites: None

Corequisites: None

MnTC Goals: None

Students enrolled in Athletic Training Clinical Experience I will receive supervised clinical experience in a variety of clinical education settings. Clinical experience settings may include but not limited to; MSUM, local high schools, local middle schools, sport medicine facilities, and other area colleges and universities.

### B. COURSE EFFECTIVE DATES: 01/17/2022 - Present

### C. OUTLINE OF MAJOR CONTENT AREAS

- Patient/Client Care: -Care Plan
  Examination, Diagnosis, and Intervention
- 2. Prevention, Health Promotion, and Wellness
- 3. Health Care Administration

## **D. LEARNING OUTCOMES (General)**

- 1. Advocate for the health needs of clients, patients, communities, and populations.
- 2. Practice in collaboration with other health care and wellness professionals.
- 3. Provide athletic training services in a manner that uses evidence to inform practice.
- 4. Practice in a manner that is congruent with the ethical standards of the profession.
- 5. Practice health care in a manner that is compliant with the BOC Standards of Professional Practice and applicable institutional/organizational, local, state, and federal laws, regulations, rules, and guidelines. Applicable laws and regulations include (but are not limited to) the following: -Requirements for physician direction & collaboration -Mandatory reporting obligations

  - -Health Insurance Portability & Accountability Act (HIPAA)
  - -Family Education Rights and Privacy Act (FERPA)
  - -Universal Precautions/OSHA Bloodborne Pathogen Standards
    - -Regulations pertaining to OTC/Prescription meds
- Self-assess professional competence and create professional development plans according to personal 6. and professional goals and requirements.
- 7. Advocate for the profession.
- 8. Develop a care plan for each patient. The care plan includes (but is not limited to) the following: -Assessment of the patient on an ongoing basis and adjustment of care accordingly -Collection, analysis, and use of patient-reported and clinician-rated outcome measures to improve patient care
  - -Consideration of the patient's goals and level of function in treatment decisions -Discharge of the patient when goals are met or the patient is no longer making progress -Referral when warranted
- 9. Evaluate and manage patients with acute conditions, including triaging conditions that are life threatening or otherwise emergent.
- 10. Perform an examination to formulate a diagnosis and plan of care for patients with health conditions commonly seen in athletic training practice.
- 11. Perform or obtain the necessary and appropriate diagnostic or laboratory tests including (but not limited to) imaging, blood work, urinalysis, and electrocardiogram to facilitate diagnosis, referral, and treatment planning.
- 12. Select and incorporate interventions (for pre-op patients, post-op patients, and patients with nonsurgical conditions) that align with the care plan.
- 13. Educate patients regarding appropriate pharmacological agents for the management of their condition, including indications, contraindications, dosing, interactions, and adverse reactions.
- 14. Administer medications or other therapeutic agents by the appropriate route of administration upon the order of a physician or other provider with legal prescribing authority.
- 15. Evaluate and treat a patient who has sustained a concussion or other brain injury, with consideration of established guidelines.
- 16. Identify, refer, and give support to patients with behavioral health conditions. Work with other health care professionals to monitor these patients' treatment, compliance, progress, and readiness to participate.
- 17. Select, fabricate, and/or customize prophylactic, assistive, and restrictive devices, materials, and techniques for incorporation into the plan of care including the following: -Durable medical equipment -Orthotic devices -Taping, splinting, protective padding, and casting
- 18. Develop and implement strategies to mitigate the risk for long-term health conditions across the lifespan.
- 19. Develop, implement, and assess the effectiveness of programs to reduce injury risk.
- 20. Plan and implement a comprehensive pre-participation examination process to affect health outcomes.

- 21. Develop, implement, and supervise comprehensive programs to maximize sport performance that are safe and specific to the client's activity.
- 22. Educate and make recommendations to clients/patients on fluids and nutrients to ingest prior to activity, during activity, and during recovery for a variety of activities and environmental conditions.
- 23. Educate clients/patients about the effects, participation consequences, and risks of misuse and abuse of alcohol, tobacco, performance-enhancing drugs/substances, and over-the-counter, prescription, and recreational drugs.
- 24. Monitor and evaluate environmental conditions to make appropriate recommendations to start, stop, or modify activity in order to prevent environmental illness or injury.
- 25. Select, fit, and remove protective equipment to minimize the risk of injury or re-injury.
- 26. Select and use biometrics and physiological monitoring systems and translate the data into effective preventive measures, clinical interventions, and performance enhancement.
- 27. Perform administrative duties related to the management of physical, human, and financial resources in the delivery of health care services.
- 28. Use a comprehensive patient-file management system (including diagnostic and procedural codes) for documentation of patient care and health insurance management.
- 29. Establish a working relationship with a directing or collaborating physician.
- 30. Develop, implement, and revise policies and procedures to guide the daily operation of athletic training services.
- 31. Develop, implement, and revise policies that pertain to prevention, preparedness, and response to medical emergencies and other critical incidents.
- 32. Develop and implement specific policies and procedures for individuals who have sustained concussions or other brain injuries.
- 33. Develop and implement specific policies and procedures for the purposes of identifying patients with behavioral health problems and referring patients in crisis to qualified providers.
