

## Topic: Audio and Video Feedback

Another option for giving feedback with the Assignment Grader is using audio or video feedback. This could be a nice way to give your students personal feedback if you can't meet with them in person.

### Audio

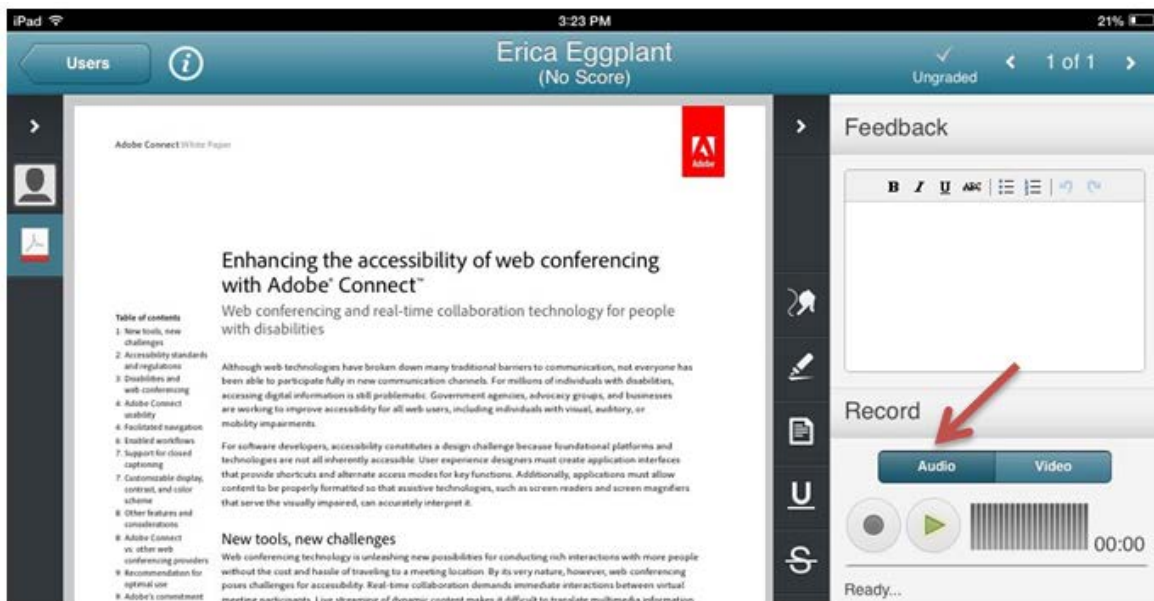

#### Step 1:

Find the assignment in the dropbox folder and click the **arrow** to bring across the right sidebar.

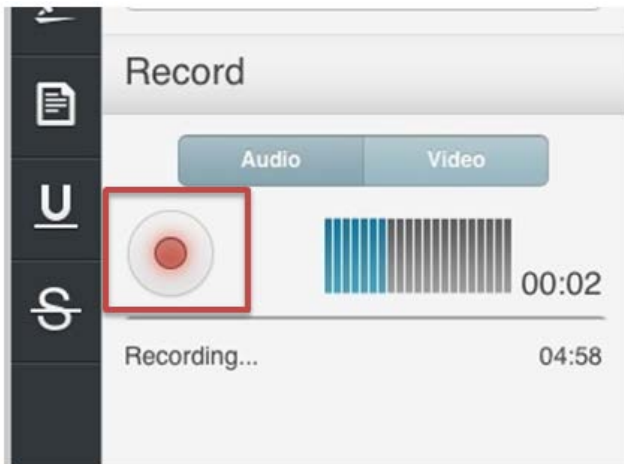

#### Step 2:

Scroll down to the **Record** heading and click **Audio**.

### Step 3:

Click the circle record button to start recording as well as finish the recording.

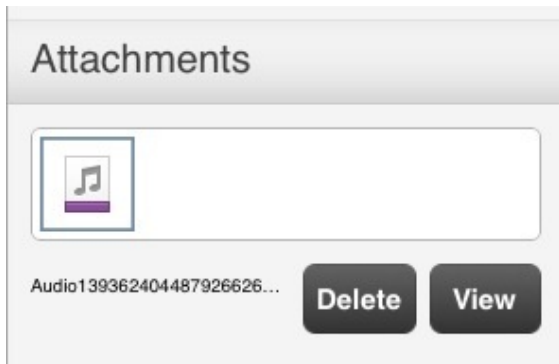

### Step 4:

When the recording is finished, it will ask you to clear it or attach the feedback. You can listen to the recording by clicking the green play button and if you are satisfied with it click **Attach Feedback**.

The feedback will then be added as an attachment to the document.

## Video

The video recording is very similar to the audio. So we will start from step 2 because the first step is the same.

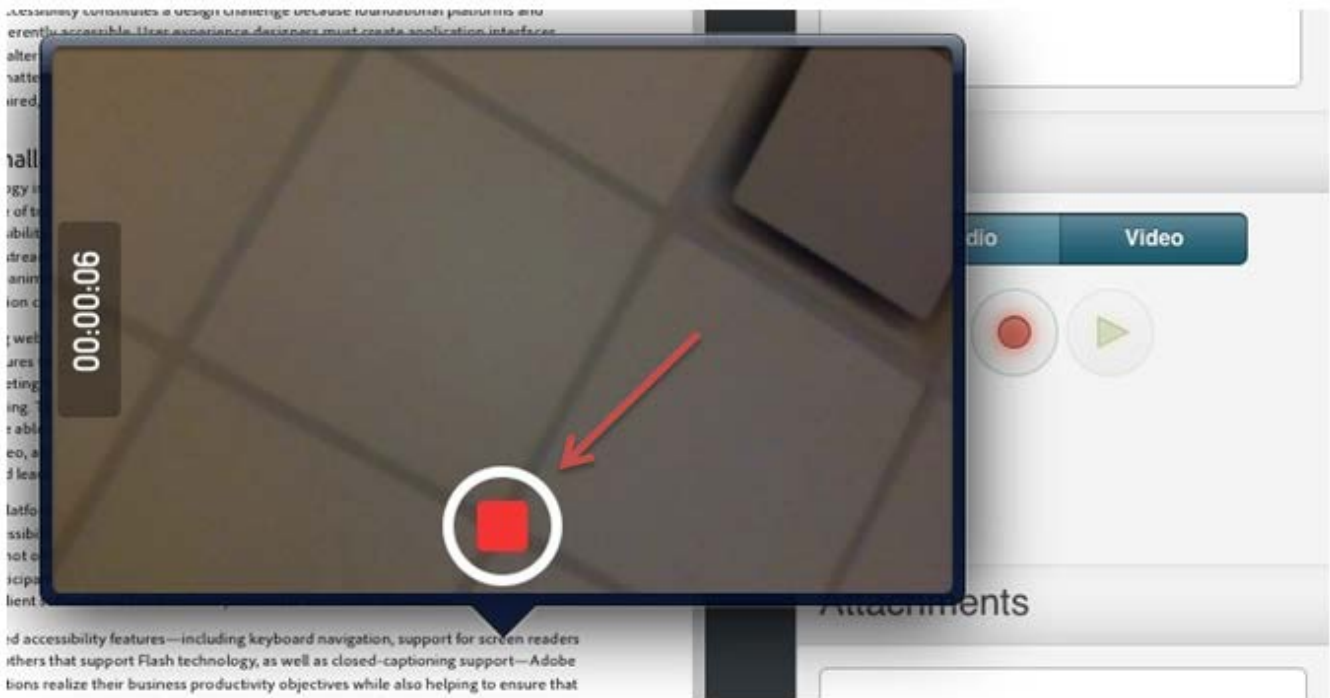

### Step 2:

Click **Video** under the **Record** heading.

### Step 3:

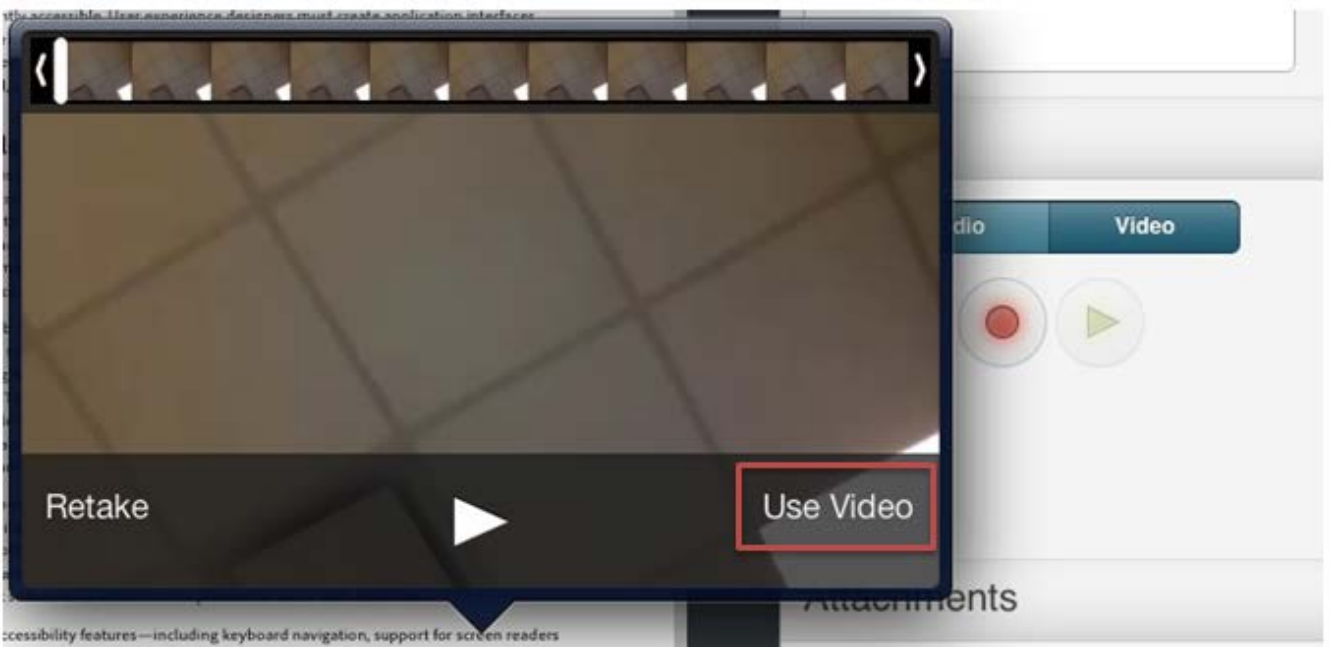

Click the circle record button to start recording your video as well as to stop recording your video.

#### Step 4:

You will have the option to play the video to review it once you have stopped the recording. If you approve of the video, click **Use Video**.

If you don't like the video, click Retake and go through the process of recording the video over again until you approve of it.

After clicking Use Video, the video will automatically be added as an attachment.
