Topic: Content Map

The Content map is a tool that can be the central point of navigation in the Content area. The Content map appears for navigation only when you are viewing a content item. It allows you to navigate to content items much easier and faster inside of the Content area without having to use the navigation bar to get where you want to go.

After logging into D2L Brightspace and choosing a course, click Content under Materials in the navigation bar.

Step 1:

Click into any content item.
Step 2:

Click on the tab with the arrow on the side of the window to expand the Content Map.

Content Map Navigation

When expanding the Content map, you will see there are a few different ways to navigate through it.

Table of Contents

Click the Table of Contents button in the top left.

This will bring you back to the Table of Contents page within the Content area.
Arrow Navigation

The arrows at the top of the page allow you to flip to different modules within the Table of Contents. Use the scroll bar to see all of the content items in each module.

◀️ Unit 1: Music History ➤

Right now we are in Unit 1: Music History. Click the right arrow.

You can now see that we are in Unit 2: The Masters from Europe because that is the next module in the Table of Contents.
Now if we click the first link in this module, it will be brought to its own page where you can open the link or you have the option to make changes to it.

Notice that on this page you are still within Content. You can navigate through Content using the links above or you can pull out the Content Map and navigate that way.

**Drag and Drop**

Professors can also add documents to the content area using the Content Map. They can simply drag and drop documents from their desktop into the Content Map.

Simply click on the desired document and drag it over into the Content Map.
