**Topic: Notifications**

In D2L Brightspace 10.3, you can see notifications for messages, updates, and subscriptions to keep track of all new changes/messages in your D2L Brightspace courses as well as set notification alerts for your content.

**Viewing Notifications**

1. In any window in D2L Brightspace, check the top right corner of your screen

2. View the Messages, Updates, and Subscriptions notification centers

3. When you receive a new message, update, or subscription, a little notification bubble will show on the notification bar under the corresponding notification center.

4. Click the notification center icon to open the center and preview what new message, update, or subscription update you have.
5. After you open the notification menu, the new notification bubble disappears until you receive a new notification.

**Enabling Notification Alerts for Content**

When you enable notification alerts for your content, it gives students the options to see the content notifications on their minibar each time that particular content item is updated. The students can also subscribe to get the content notifications via e-mail if you choose not to enable the notification alerts.

**Step 1:**

For pre-existing items, use the dropdown arrow next to name of your content topic and choose Edit HTML.
Step 2:

At the bottom of the page, check the box that says *Notify students that the content has changed*.

![Path and change options](image)

Step 3:

When you are done completing changes, click **Update**.
