**Topic: Locker Overview**

A **Locker** is your own personal storage area within D2L that you can use to store a variety of files.

The files that you place in your **Locker** can be either private or public depending on the preferences you set for the files.

**Accessing Locker:**

Public files mean that those who are within the D2L system (and with the right permission) can view your files within your locker.

Private files mean that you are the only one who can see them in your locker.

**You are not allowed to upload the files with the following formats:**

- .asp
- .bat
- .config
- .dll
- .exe

**Access Locker from the Course:**

- Click **MATERIALS**.
- Click **Locker**.
