Topic: Overview

What is Dragon Naturally Speaking?

Dragon Naturally Speaking, also known just as ‘Dragon’, is a speech recognition software. Dragon allows you to:

- Type words
- Click and move the mouse
- Open applications and folders
- Press keys
- Select menu items
- And much more...

...by using just your voice!

By using voice commands, you can do all of the above without touching your keyboard mouse.

For example:

“Wake up” (Microphone turns on)

“Open Notepad” (Opens the Windows notepad application)

“Grocery list, colon, new paragraph, milk comma, eggs comma....etc” (Types text)

This example is one of thousands. Dragon Naturally speaking allows you to type up to 3x faster than by typing with a keyboard.
