**Topic: iGrader**

The iGrader allows you to view all poll data recorded by using your i>clicker system. This recorded data is exported in HTML page reports.

**Creating Poll Reports**

In order to view i>clicker reports, you need to export them from your class poll data. To do so:

1. Open your iGrader located in your i>clicker folder

   ![i>clicker folder with iGrader]

2. Select Run

   ![Open File - Security Warning dialog]

3. Select your course and press Choose
4. The i-grader window will open. Here you can view all students/clickers that have already taken a part of your polls. Registered remotes will have names shown instead of remote ID’s.

### Viewing Reports

To view your poll report(s):

1. Click the Export Menu

2. Select what student information will be included in the reports.

Note: If students haven’t registered their remotes, only a remote ID will show.
3. Select **OK**

4. A window will open telling you that your report was successfully generated (or updated) your HTML reports. These reports include term session summary and review (cumulative and individual session polling data) and your student voting data (individual students’ polling statistics)

![Report Summary](image)

5. **After selecting Close,** open your i>clicker folder and open **Classes**

6. **Select the class you wish to view your reports from**

7. **Open your class folder and select Reports**

8. **When in the Reports folder, select your SessionDetail, SessionSummary, or StudentTerm report to view statistics on poll sessions.**

Note: If you run another instance of a poll, there will be another SessionDetail and SessionSummary HTML file that will be put in the Reports folder.
Session Detail Report

The Session Detail Report shows question details, poll details, and student info and answer totals.

Student Session 3/14/14 Report: **CHEM 301-a-1**

<table>
<thead>
<tr>
<th>Student Info/Total</th>
