Introduction

The questions used in this tool are based on the Student’s Evaluation of Course and Instruction form that is found on the Academic Affairs web site. The standard form contains four open ended and three ranked questions.

1. What did you like MOST about the course?
2. What did you like LEAST about the course?
3. Would you recommend this instructor to your friends?
4. Any additional comments regarding the course or instructor?
5. How would you rate the instructor's overall teaching performance? (Exceptional to Very Poor)
6. How would you rate the instructor's knowledge of the subject matter? (Exceptional to Very Poor)
7. How would you rate the instructor's respect and concern for students? (Exceptional to Very Poor)

You can add more questions to the course evaluation in addition to the seven standard questions provided with the form.
Students log into the evaluation from the MSUM web site using their StarID. Instructions are given in a later section of this tutorial that you can share with your students on how to access your evaluation.

Although the student logs into the evaluation form using their StarID, their answers are completely anonymous. Results are not tied to any individual student. A student can complete the evaluation only once.

Results cannot be viewed until after the grades are due for the current term.

Students can print out the confirmation page at the end to receive credit for completing the evaluation. The confirmation page includes their full name, course title, and the instructor’s name.
