Topic: Adding a Panopto Link to D2L

For instructors that use Panopto and D2L for the same course, a very easy way for your students to see your Panopto lectures is to add a link for them right into the course on D2L.

1. Find the lecture you want to share in Panopto.
2. Hover your mouse over the video name to display the video menu below it and click the Share icon.

3. If necessary, change the folder permissions to public.

4. Copy the link in the space next to where it says Public URL.

5. Log into D2L to make the link for the lecture.
You can add the link in Content, as a News item, etc. In this example, we will put the link in **Content**. This can be found under **Materials** in the navigation bar of your D2L course.

6. Click **Materials + Content**. Click the arrow next to **New** and choose **Create a Link** in the drop-down menu.

![Create a Link](image)

The **New Link** window appears. Use this window to paste in the link that you just copied in Panopto.

7. Enter a **Title** for your link (e.g., Unit 3 Lecture).
8. Paste the link that you copied from Panopto into the **URL** field.
9. Select the **Open as External Resource** check box to have the Panopto video open in a new tab.

10. Click **Create**.
