

## Topic: Notes, Bookmarks, and Discussion

These features can make your class lectures more interactive and useful to students. The search feature is the only one that does NOT require students to log in using their StarID (top right corner when watching a video)

### Notes

Notes are synchronized to what you are watching when you type them. It's an easy way to remember few major points. **See the below image.**

### Bookmarks

Bookmarks let you put a placeholder at a specific point in the video. If you need to stop watching and come back to it later, using a bookmark may be very helpful. Bookmarks can also be used to mark any important parts of videos that you want to have quick access to in the future. Type and hit **Enter** to add a bookmark. **See the image on the next page.**

Notes	<a href="#">See all your bookmarks</a>	<a href="#">Help</a>
<b>Bookmarks</b>	Line 1	0:09
Comments	<b>squiggle</b>	0:13
Add a bookmark		

These bookmarks will then be compiled into your bookmarks tab on the homepage (coursecast.mnstate.edu) for future viewing.

The image shows the Panopto navigation menu. At the top is the Panopto logo. Below it are several menu items: Home, Shared with Me, Everything (with a count of 5576), In Progress (with a count of 1), Bookmarked (with a count of 1), Browse, and System. The 'Bookmarked' item is highlighted with a red bar on the left.

## Discussion

Discussion is used for leaving feedback on videos. Comments can be seen by anyone. Type and hit enter to add a comment.

Notes	<b>Nice lines!</b>
