

## Topic: Viewing Requirements

To view Panopto videos, all you need is a compatible browser, the right plugins for your browser, and the time to watch your video! No logging in is required.

### Browsers

Panopto is compatible with most browsers. Viewing Panopto videos on Internet Explorer (8+), Firefox, Chrome, or Safari are the best browsers to view Panopto Videos on.

Make sure you check for browser updates once in a while, new browser versions are released almost monthly.

### Plugins

Most of the time, when students can't view a teacher's recording, it is because:

1. The teacher has not turned on sharing for their video
2. The Browser is not compatible with Panopto
3. The Browser does not have **Silverlight** installed

Download and Install Microsoft Silverlight here:

<http://www.microsoft.com/silverlight/>

Once Silverlight is installed and you are using a compatible browser, you should be ready to view any Panopto Video.
